

## Why should I get a computer?

I don't need a computer, I can use my smartphone to write emails and look up information.

But a computer can help you to do so much more!

As our society becomes more and more digitalised, you may find a smartphone can't do all the things you need. A computer can help you reach the next level, whether you are a student, looking for a job, or hoping to start your own business.

## How can a computer help me?

- ✓ **Write like a pro:** write and send longer emails, write official letters, attach documents.
- ✓ **Upgrade your homework:** complete homework online, create presentations for class, access online learning platforms.
- ✓ **Find a job:** write a CV, search and apply for jobs online, use common tools like Word and Excel with confidence, follow free online courses to learn new skills.
- ✓ **Be your own boss:** Create a website, advertise your services, learn to keep accounts, sell your products online, create invoices, register your business.
- ✓ **Administrative tasks:** Apply for official paperwork, register to vote, find information on your legal rights, learn whether you can get support from the government or other organisations.

**Sounds good, but you don't know where to start? Don't worry!**

Digital Inclusion runs computer classes on many of these subjects. Check out our website or our Facebook page to find information on our latest courses:
